What is Patient Safety? How do we teach it?

Are you a Clinical Teacher? This seminar is for you

Monday 10th March 2008 9am – 12.30pm
Darlington Centre Conference Room 2
University of Sydney

CIPHER invites you to a stimulating morning of discussion with experts on patient safety education.

This seminar will provide an overview of patient safety education and explore various methods for its integration into clinical practice and medical education and training.

The AMC now requires medical schools to demonstrate where and how they incorporate patient safety education into existing curricula; vocational colleges are also examining ways to include patient safety into existing curricula. Clinicians of the future will integrate patient safety principles and concepts into bedside teaching. (See “Teaching patient safety to clinicians and medical students” by Merrilyn Walton: <http://www.blackwell-synergy.com/doi/full/10.1111/j.1743-498X.2007.00187.x>)

The Australian Patient Safety Education Framework provides a template for curriculum development. But patient safety is not just another subject and requires attention to context.

Registration fee: \$50 inc. GST. (University of Sydney employees who choose to pay via Journal Transfer will not be charged GST)

Contact: Christine du Fresne

Email: christened@med.usyd.edu.au

Phone: 02 93514542

Number of places: 50

Please note that if you do not register we cannot guarantee a place will be available for you at the seminar.

What is Patient Safety? How do we teach it?

Programme
